### PART A: CONTEXT

- 1) The tester will provide you with some context about *Rooted* and the purpose of the application.
- 2) You are given a set of tasks (Part B). Your job is to complete each of these tasks.
- 3) There will be one or two short questions to respond to for each task.
- 4) Finally, there is a set of five likert-scale questions about your *Rooted* experience.

### PART B: TASKS

You just opened the *Rooted* application. Create an account with the following details:

**Email:** [user@test.com](mailto:user@test.com)

**Password:** password123!

and log in with your details.

Overall, how difficult or easy was the task to complete?

Was the navigation between screens clear and simple?

Now that you're in the app, you want to create a goal. Create a goal to **run a 10km race on 25/12/2026**.

Overall, how difficult or easy was the task to complete?

Would it help for extra information to be provided for any buttons or actions?

Now that you have a goal, you want to create habit so you can progress towards it. Make a **new habit generated based on the 10km goal**.

Overall, how difficult or easy was the task to complete?

Did you have to remember anything about the goal to create the habit?

Now that you have a goal and a habit to progress towards it, you want to set an activity for tomorrow so you can get going. You want to start light, so the activity should be to **Go for a 3km run**.

Overall, how difficult or easy was the task to complete?

Is the difference between Goals, Habits and Activities clear?

You now want to set your postcode, so you can complete local community activities. Set your **postcode to 4128**.

Overall, how difficult or easy was the task to complete?

You're done with the app. **Log out** of *Rooted*.
